CCS1.MPM.3 O - Optimizing health data design and use in British Columbia through a patient-led interprofessional collective approach

Connected Care and Interoperability

🕒 2:20 PM – 2:40 PM

📍 Breakout Room 1 - Pier 2 & 3

Description

This presentation explores how the patient-led, consensus-based approach of the identified The Health Data Collective - BC Working Group fostered collaboration to improve health data design and use. By prioritizing principle-based commitment over organizational mandates, the group advocates for integrated, interoperable health data solutions, to advance connected care and interoperability across Canada.

Speakers

- **Claire Snyman**, Two Steps Forward, Patient Experience Consultant
- **Glynda Rees**, British Columbia Institute of Technology, Program Lead Digital Health
